THE FALLOUT BEGINS! - COLD WAR GOES GOLD ON PC

DreamCatcher Games Stealth Action Thriller Goes Gold on PC CD-ROM

Toronto, Canada - September 21, 2005 - DreamCatcher Games, a global publisher of interactive entertainment, today announced that the company's highly anticipated stealth action game "Cold War" has gone gold in North America for PC CD-ROM. 'Cold War' is scheduled for release on September 27th priced at $39.99 on the PC and $19.99 on the Xbox® video game system from Microsoft

"Cold War puts stealth fans into a world of secret gadgets, classified documents, and international espionage", commented Product Manager Byron Gaum. "With its unique premise, Cold War is destined to become one of the sleeper hits of the year".

Rated "T" for Teen by the ESRB, Cold War follows the story of Matt Carter, a freelance American journalist, who finds himself in the midst of an international conspiracy that aims to take control of the U.S.S.R. Twelve hours after arriving in Moscow for a routine story, Carter is stripped of all his possessions, beaten unconscious and thrown into the KGB's political prison. Using only recovered weapons and improvised gadgets, he must now evade and overcome elite Soviet forces and defeat the conspiracy before he is sent to a Siberian prison camp or killed.

Features include:

- Strong espionage/stealth gameplay – including gadgets like the powerful and deadly X-ray camera that allows you to spy on your enemies through walls and destroy explosive objects.
- Powerful and widely-recognized setting - mid-1980's U.S.S.R.
- Interactive non-linear world. Accomplish objectives in multiple ways utilizing stealth and brute force – find hidden paths, combine in-game elements to create deadly gadgets and traps, or silently eliminate opponents.

- Explore accurately recreated Soviet locations including Lenin's Mausoleum, Chernobyl, the Kremlin and the KGB's notorious Lubyanka prison.
